

PLAYING SURFACE STRUCTURE AND METHOD OF
CONSTRUCTION OF A PLAYING SURFACE

ABSTRACT OF THE DISCLOSURE

5 A playing surface structure (100) comprises, a
surface carpet layer (102), a resin impregnated textile
layer (104), a random pile layer (108) comprising a
compact resin loaded fibre stratum (109) and a layer of
stratified fibrous material (110). The surface carpet
layer (102) overlays the textile layer (104), the textile
layer (104) overlays the random pile layer (108), and the
layer of stratified fibrous material (110) is overlain by
10 the random pile layer (108). A method of construction of
a playing surface is also disclosed.
